Reflection related to learning style

I learn best when…..

1. **Place:** If you could learn in any environment you wanted, describe the place in which you would most like to learn.

2. **Process:** What methods (or processes) do you most like to use when you are learning something new? (E.g. You may prefer to get your information by reading a book or magazine, from a TV program, or through discussions with other people, etc.)

3. **Person:** Who was your favorite teacher/coach/guide in learning? What adjectives best describe this person’s personal and professional characteristics? What methods (processes) did they use?

   Do you feel ready to learn? Are there any circumstances that might adversely affect your success in learning the material for this class?

4. **Share:** What strategies work best for you that you would be willing to explain to other students in the class?
