

**In sequence of
three years there
was one, then
two, then three
local horses near
the study site**

Horses passing by camp

Horses are often seen on the drive between Burns and Fields

**Horses at home on the range in the Catlow Valley,
to the west of Alvord Peak**

Horses on their evening path, W of Catlow Rim

Horses on their evening path, W of Catlow Rim

Cattle are abundant in the Catlow Valley

**The study
site is on
open range,
so cattle may
use the site
or at least
pass through
it during the
winter**

Pronghorn near the study site

Pronghorn are more common in the uplands by mid-July

Ungulate tracks on hardpan

Encountering jackrabbits is a daily occurrence on plot

Jackrabbit staying cool

More Jackrabbits

Jackrabbit near SAVE on hardpan

**Jackrabbit,
alarmed,
and
ready to run**

In wetter years, chipmunks frequent the Alvord Basin

Kangaroo rats are abundant on the study site

**By the third week, all local K-rats have
discovered the opportunities at our campsite**

Tracks in the dune sand

**Another
resting
nighthawk**

Common Nighthawk resting at the oasis in Fields

Can you see the nestling nighthawk?

Common nighthawks nest on site

**Sage sparrow nest
with
cowbird eggs
added,
found 0.75 m up
in an
Artemisia tridentata
on the study site**

**Great horned
owls live at the
Fields oasis**
